

Michelle Mbaita

Inspired by the social impact technology has made, and the potential therein, Michelle's mission is to contribute towards building solutions that go towards solving societal issues. "First, solve the problem. Then, write the code." - John Johnson, is what she lives by, and this has inspired her to take on a project that tackles how to improve the air quality in Kenyan Public Service Vehicles with an aim of improving a passenger's experience during a commute as well as reducing the risk of contracting respiratory diseases from inhaling contaminated air within the vehicles.

- Intermediate knowledge in architectural styles such as REST API.
- Familiarity with database management systems such as PostgreSQL
- Basic knowledge of cloud computing protocols in Amazon Web Services.
- Familiarity with testing code.
- Familiarity with Figma and Adobe Illustrator.
- Familiarity with GitHub

Educational Background

AkiraChix- Diploma in Information Technology
February 2021-Present

CodeHive Program:

- Internet of Things
- Front-End Development
- Back-end Web Development
- Front-End Mobile Development
- UI/UX Design
- UX Research
- Professional Development
- Navigating Your Journey

Projects

School system

Web app built-in Django that helps in the management of a school institution.

https://github.com/Michellembaita/Django_Schoolsystem

Student Registration App

Built an app that is able to interact with an API.

<https://github.com/Michellembaita/Kotlin-Registration-App>

Food Delivery website

Built a food delivery website using HTML/CSS and javascript, where customers can pick and order from an array of meals.
